Technical Seminar Presentation by Paul Shadbolt

The role of fire doors and doorsets

The presentation explains the purpose of fire doors and doorsets in buildings and examines each of the critical components that make a fire performing assembly fully operational.

Aspects of Part B, Part E and Part M of the Building Regulations are discussed as is the new EN standard BSEN 1634: Part 1: 2000.

There is a brief video clip of what a fire test looks like and an explanation as to what the subsequent test certificate contains.

The presentation also touches on the recently introduced Regulatory Reform (Fire Safety) Order and how specification of third party assured products and installers can both improve reliability and safety and reduce risk.

Directors: S.R.J. Shadbolt, P.B. Shadbolt. Co Sec: T. Wallace B.H., A.C.A.
Registered in England No. 324176. Established in 1884.
